

Lucas Viana da Silva

Lorena, Sao Paulo, Brazil • lucasv4555@gmail.com • linkedin.com/in/olucasv • github.com/LucasViana4555

Objective

Developer in training and enthusiast of the **Java** ecosystem, with hands-on experience in full-stack application development and service integration. Seeking to join a development team to collaborate on the creation and maintenance of systems while improving technical skills in dynamic professional environments.

Professional Experience

Apprentice

Cruzeiro, SP

Iochope-Maxion S.A.

Feb 2024 - Dec 2024

- Supported digital transformation initiatives by developing, testing and documenting technology solutions.
- Built **Java** applications and **PHP/Laravel** web systems, working on business logic, data persistence, maintenance and user support.
- Modeled data in **MySQL** and collaborated using **Git**, agile practices and problem-solving routines.

Relevant Projects

AtivHub - Gamified Learning Platform - Live • Frontend • Backend

Personal

Java, Spring Boot, PostgreSQL, Next.js, React, TypeScript and Tailwind CSS

2026

- Solved low student engagement and manual assignment tracking by building a **Full-stack LMS** with gamified missions, XP, levels, submissions, feedback and a global ranking.
- Solved secure access and data consistency needs with a **Spring Boot REST API**, **JWT**, role-based permissions, PostgreSQL, JPA/Hibernate and Flyway migrations.
- Improved usability for teachers and students through a responsive **Next.js/React** interface with dashboards, protected routes, API integration and friendly error handling.

Premier League Statistics Project - GitHub

Personal

Java, Spring Boot, React and PostgreSQL

Jan 2026 - Feb 2026

- Solved fragmented sports data access by developing a **Full-stack** application with **Spring Boot**, **PostgreSQL**, REST APIs and HTTP endpoints for structured queries.
- Improved data integrity and maintainability through business rule validations, duplicate prevention and integration testing scenarios.

Inventory Management System - GitHub

SENAI

PHP, Laravel and MySQL

Mar 2024 - May 2024

- Solved manual inventory tracking issues in a team project by building a system with product registration, queries, updates and relational database persistence.
- Improved operational reliability by supporting business rules, data modeling and organized information flow with PHP, Laravel and MySQL.

Education

Faculdade Serra Dourada

Lorena, SP

Associate Degree in Systems Analysis and Development

Expected Graduation: Jul 2027

Teaching Assistant: Object-Oriented Programming – technical support and practical programming activities.

SENAI

Lorena, SP

Technical Degree in Systems Analysis and Development

Feb 2023 - Dec 2024

Certifications and Languages

- **Google AI Essentials V1** – Coursera - Credly
- **Languages:** Portuguese native and English intermediate.

Skills

- **Programming:** Java, PHP, JavaScript, Spring Boot, Laravel, React, REST APIs and software modeling.
- **Cloud/Infrastructure:** cloud computing, Linux, Windows, networking fundamentals, DNS, VPN and security basics.
- **Databases/Tools:** MySQL, PostgreSQL, SQL, data modeling, Git, GitHub, agile methods, testing and technical documentation.
